

## Htेशam Usman

Frontend Developer

BHOLARAM SHIVLAL KHARAKIA COLLEGE • 2020 Pass out

### Work Experience

#### React Application Developer @ Belforbes Communication Pvt Ltd, Kolkata

Feb 2023 - May 2023 (3 months) | Full-time

- Meebook Meta is a social media and work showcasing app that combines social networking with professional networking. Users can create personalized profiles, connect with others, and even hire individuals for job opportunities.
- I worked as a React Developer Intern on the front-end development of the admin page for the Meebook Meta app. I created the entire user interface and web page independently using React and integrated it with the main app's API.
- I also assisted in improving the main page of the Meebook Meta app by implementing data fetching logic and developing a filtering feature. The filtering feature allows users to view people of the same category and enhances the user experience by providing filtered results based on user preferences.

Skills Developed: React.js, Javascript, Redux, HTML, CSS

### Projects

#### Movies List

- Platform use : React
- Having the functionality of getting Trending Movies, All movie, TV Series and you can search any movie. • Users can check movie details
- Using Material UI for design the UI of the Project • Using The Movie DB API for getting data of movies • Managing state, Routing, Pagination.

Skills Developed: React.js, CSS, Javascript

BHOLARAM SHIVLAL KHARAKIA COLLEGE , JHARKHAND

B.Sc., Zoology | 7 CGPA

2017 - 2020

### Certifications & Courses

#### Front End Development

- Learned the basic fundamentals of front end development

December 2022 | [Certificate Link](#)

#### Reactjs Development

- Learned basic fundamentals of React js

December 2022 | [Certificate Link](#)

- JavaScript is used for getting data from API and rendering in UI.

Skills Developed: HTML, CSS, Javascript

## Amazon Clone

- The clone employs Firebase for registration and authentication, enabling users to sign up using their email and password.
- It mirrors Amazon's product browsing and cart addition mechanism, allowing users to explore items and easily add them to their cart.
- Users can conveniently manage their cart, proceed through checkout, access detailed product information, and enjoy responsive design, all facilitated by Firebase for authentication and user profiles.

Skills Developed: React.js, HTML, CSS, Javascript, Firebase

## Position of Responsibility

### Frontend developer

- Learned new technology and created some fun project.
